### Mission Information:

Objective / Description: Perimeter monitoring and heat sources location.

North (DMS): D: 35 M: 3 East (DMS): D: -119 M: 51  
 South (DMS): D: 34 M: 49 West (DMS): D: -120 M: 13  
 NE/SE to NW/SW (longitude): 14 NM  
 NE/NW to SE/SW (latitude): 17 NM

Comments: There was a small ftp snag, but I got the data by 2145 PDT. I would request to post the color IR ortho strips to the FTP. I find them more useful sometimes than just the gray ortho strips. Strips 1 & 2 last night needed more overlap. They looked good otherwise. The fire's only growth was on the east side by 400 acres. There were four possible spots outside the perimeter where folks thought things were cold so I had ops folks check them out shortly after delivery.
